ATTACK!

Controlice®
OIL SPRAY

SCHEDULING STATUS
To be allocated.

PROPRIETARY NAME AND DOSAGE FORM
Controlice® Oil Spray (Oil).

COMPOSITION

Active Ingredients	Per 60 ml:
Cocos nucifera (Coconut) Oil	23,69 g
Illicium verum (Aniseed) Oil	6,69 g
Cananga odorata (Ylang-ylang) Oil	0,51 g

Inactive Ingredient: Isopropyl alcohol.

PHARMACOLOGICAL CLASSIFICATION
D.32.7 Other substances or agents - Topical applications of delousing agents.
Combination Western Herbal Medicine.

INDICATION
Controlice® Oil Spray contains active ingredients, which can assist with the topical management of head lice (*Pediculus capitis*) infestation. For a diagnosis or if symptoms persist, consult a medical practitioner. Efficacy of support may vary between users.

CONTRAINDICATIONS
Do not use if known hypersensitivity or allergy exists towards any of the ingredients.

WARNINGS AND SPECIAL PRECAUTIONS
FOR EXTERNAL USE ONLY. Do not use if known hypersensitivity or allergy exists towards linalool or any of the other ingredients. Do not apply to damaged or broken skin. Avoid contact with eyes and mucous membranes. If product gets into eyes, wash out immediately with water, and seek medical advice. Upon accidental ingestion, do not induce vomiting. Drink plenty of water, and seek medical advice. Products containing herbal ingredients may interact with some medication. If you are taking any chronic medication, do not use this product without consulting your medical practitioner. Use only as directed. Do not use after date of expiry. See expiry date on unit. Keep away from open flames.
Porphyria: Safety has not been established.
STORE OUT OF REACH OF CHILDREN.

INTERACTIONS
None reported.

PREGNANCY AND LACTATION
Safety for use during pregnancy and lactation (breastfeeding) has not been established.

DOSAGE AND DIRECTIONS FOR USE
FOR EXTERNAL USE ONLY.
Use only as directed. Keep away from open flames.
Adults and children 2 years and older:
1. Test for sensitivity on the inside of the forearm.
2. Apply to dry hair.
3. Hold the spray bottle in a vertical position and spray the Controlice® Oil Spray to cover hair.
4. Ensure uniform distribution on hair and scalp (use fingers to assist with even distribution).
5. Leave the application on the hair for at least 15 minutes.
6. Comb hair thoroughly with a Controlice® Comb, area by area to remove all nits and dead head lice.
7. Comb from the base of the hair, as near to the scalp as possible, through to the hair tip.
8. Thereafter wash hair with Controlice® Defence Shampoo or normal shampoo.
9. **Important:** Repeat after 7 days to ensure that the full life cycle of the lice are covered.

SIDE EFFECTS
If you experience any side effects or sensitivity towards linalool or any of the ingredients, discontinue use. If symptoms persist, or if any adverse reactions occur, consult your medical practitioner. Side effects may include, but are not limited to allergic skin reactions.

KNOWN SYMPTOMS OF OVERDOSAGE AND PARTICULARS OF ITS TREATMENT
There are no known symptoms of overdosage. However, if irritation or any other adverse reactions occur, please consult a medical practitioner. Treatment is symptomatic and supportive.

IDENTIFICATION
Yellow oil.

PRESENTATION
60 ml oil in a plastic spray bottle, in a unit carton, with a package insert.

STORAGE INSTRUCTIONS
Store below 25 °C. Store away from direct sunlight.
Keep away from open flames.
STORE OUT OF REACH OF CHILDREN.

REGISTRATION NUMBER
To be allocated.

Send Head Lice packing:

ATTACK with – Controlice® Oil Spray/Controlice® Head Rinse
COMB with – Controlice® Lice Comb/Controlice® Lice Buster
PROTECT with – Controlice® Defence Shampoo/ Controlice® Defence Spray

LICE FACTS

Head lice are small, fast crawling parasites that feed on human blood. They're clear in colour when first hatched, and then quickly develop a reddish-brown colour after feeding. An adult louse is about the size of a pin head and their nits (eggs) are about two thirds smaller. In order to survive, lice need to feed on the blood of their hosts every 3-4 hours. While on their hosts they also extend the lice population by mating every 3-4 hours. On average they stay alive between 23-30 days.

WHO GETS HEAD LICE AND HOW DO THEY GET THEM?

Only humans can get head lice. If stranded away from the human scalp they die quickly (1-2 days). The usual way people are infested is from direct hair-to-hair contact with another person. Head lice don't have wings therefore they cannot fly or jump from head to head without assistance, but they are terrific runners and they can hide. Head lice have six legs and grasp the hair with claws.

Lice infestations can come from almost anywhere:
A classmate, another child's clothing, hat, comb or brush.
Lice outbreaks are common among school children and even the cleanest child can easily become infested. During a lice infestation, it is important that you INSPECT all family members for at least two weeks.

Head lice should be suspected when there is intense itching of the scalp and/or at the nape of the neck. You will see small, whitish nits attached to the hair shaft. Head lice may also be indicated if one finds tiny, black spots on bed pillows, sheets or clothing near the neckline and shoulders. These black spots consist of digested blood excreted by a head louse after feeding.

ATTACK:
The active ingredients in Controlice® Oil Spray / Controlice® Head Rinse can be used to eliminate head lice already infesting the hair. It is very important to use the product as directed. After using the Controlice Oil® Spray / Controlice® Head Rinse, it is necessary to comb out all the nits and dead head lice with a Controlice® Comb. The Controlice® Combs are precision engineered products that are very effective in removing nits. The unique tooth configuration provides a gentle scraping action which dislodges lice and nits without damaging the hair. Use the Controlice® Lice Buster for long hair and the Controlice® Lice Comb for short hair.

Important: Repeat treatment and combing after 7 days.

PROTECT:
Controlice® Defence Shampoo and / or Controlice® Defence Spray contain active ingredients which repel head lice and protect against head lice infestation during a lice outbreak. It can be used by adults and children. Use the Controlice® Combs on a regular basis to check for head lice.
